Módulo03

Introdução a APIs e a requests

[ReadTheDocs - Requests](#)

[AwesomeAPI](#)

Tratando erros / retentativas

[Documentação sobre *Erros*](#)

[Errors erros - data hackers](#)

[pacote backoff](#)

Criando logs

```python
import logging

log = logging.getLogger()
log.setLevel(logging.DEBUG)
formatter = logging.Formatter(
'%(asctime)s - %(name)s - %(levelname)s - %(message)s')

ch = logging.StreamHandler()
ch.setFormatter(formatter)
log.addHandler(ch)

import logging
logging.getLogger('backoff').addHandler(logging.StreamHandler())
```
